ACTIONS SPEAK LOUDER™

Derya is one global brand. We engineer and produce a deep lineup across our facilities in **Türkiye**, supported by our U.S. operations in **Jacksonville, Florida** — bringing real innovation and real value to American shooters.

From striker-fired pistols to mag-fed shotguns and modern rimfire rifles, every Derya is engineered in-house, built to a higher standard, and **backed for life**. Full process control — from tooling and injection molding to final assembly — means more innovation, more configurations, and real value.

LIMITED LIFETIME WARRANTY

W H A T W E ' R E B U I L D I N G

- A deep lineup engineered & produced across our Türkiye facilities
- World's largest shotgun exporter in 2021 — the biggest year in firearms history
- In-house molds, injection molding, barrels, slides & major components
- Proprietary tech — Second Wind Trigger™ · BufferBolt™ · Trifling Trigger™
- Mono-block steel receivers & the Island Barrel
- Optic-ready platforms & 10+ injected colors
- ISO 9001 & SAAMI quality standards
- U.S. operations in Jacksonville, Florida

SAAMI® ISO 9001 · SAAMI MEMBER
SPORTING ARMS AND AMMUNITION MANUFACTURERS' INSTITUTE, INC.
SINCE 1926

O U R F A C I L I T I E S

ONE BRAND. MULTIPLE FACTORIES.

Manufacturing at scale across Türkiye, with U.S. production in Jacksonville, Florida — full process control across every line, from raw stock to finished firearm.

TÜRKIYE

MULTIPLE FACILITIES · 500,000+ SQ FT

Decades of precision manufacturing at scale — machining, injection molding, finishing, and assembly across multiple plants.

JACKSONVILLE, FLORIDA

U.S. OPERATIONS · JACKSONVILLE

More than assembly — our Jacksonville facility runs injection molding, CNC machining, assembly, service, and distribution under one roof.

IN-HOUSE · TOOLING · INJECTION MOLDING · CNC MACHINING · FINISHING · ASSEMBLY · PROOF TESTING

INNOVATION IN-HOUSE.

More than five proprietary technologies — **engineered, tooled, and tested under our own roof.** No licensed designs, no outsourced shortcuts. This is what makes every Derya shoot better than its price says it should.

SECOND WIND TRIGGER™

Flat-faced, short-reset striker trigger tuned in-house — faster, more confident follow-up shots on every DY9.

BUFFERBOLT™ SYSTEM

A recoil-absorbing bolt buffer that keeps mag-fed 12GA flat and soft — so you stay on target shot after shot.

ISLAND BARREL

Integrated porting vents gas to cut muzzle rise — a flatter-shooting pistol with no added parts and no added bulk.

MONO-BLOCK RECEIVER

Receivers built from a single piece of steel — no joints, more rigidity, and accuracy that repeats for life.

TRIFLING TRIGGER™

A crisp ~2-lb flat-faced rimfire trigger — match-grade feel that makes every TM22 punch far above its price.

MACHINED IN-HOUSE

Barrels and slides cut from raw material on our own CNC lines — quality we control, value you keep.

VERTICAL INTEGRATION · PROCESS CONTROL

We control more of the manufacturing process in-house than most factories in our category — **mold development, injection molding, stamping, barrel making from raw material, slide production, triggers, and finishing.** Owning the process end to end is how we deliver tighter quality, batch-to-batch consistency, and real value.
